

Declaration of Conformity for the REACH Regulation (EC) 1907/2008

Classification

The Masterflex SE is categorized as a "downstream user" in accordance with the REACH Regulation (EC) No. 1907/2008. The Masterflex SE is not a manufacturer of substances, mixtures, or products.

Bases of the Declaration of Conformity

The Masterflex SE are in principle aware of the requirements of the REACH regulation and comply with their obligations to implement REACH in a lawful manner.

We have established communication with our suppliers and, as a dealer and not a manufacturer, depend on their information. Our suppliers have confirmed to us that they have completed the pre-registration or have the intention to register their substances. Should materials be covered by the exemption under REACH, we are immediately informed.

A pre-registration does not guarantee that a raw material will be actually registered at a later date. On the basis of the transition period to the actual registration of individual substances, which takes place following the pre-registration phase, we are unable to make any concrete statements at this point in time.

The Masterflex SE declares that, on basis of the available supplier data, the products sold meet the requirements of the REACH Regulation (EC) No. 1907/2006.

Information requirements in accordance with Articles 31 and 33 of the REACH Regulation

Pursuant to Article 33, Para 1 of the REACH Regulation, Masterflex SE is obligated to the disclosure of information if products contain SVHC substances in concentrations > 0.1 mass percent.

Depending on the requested supplier information, Masterflex SE complies with their information requirements.

Mixtures are created in accordance with Article 31, Annex II of REACH Regulation Safety Data Sheets. These data sheets also contain notes on the SVHC substances, which were/are included in the candidate list under Art. 59. Necessary changes and additions to the current safety data sheets will be made successively in the course of a new edition of the product.

Once information about SVHC substances in products or mixtures is available to us, we will inform our customers about it.
